WORK

Clinical Database Programmer @ Medpace

Mar 2026 - Present

Developing and maintaining clinical trial databases ClinTrak EDC system, supporting the design and implementation of data collection tools for clinical studies. Ensuring data integrity and accuracy throughout the trial lifecycle in compliance with industry standards.

ACADEMIC EDUCATION

Master of Bioinformatics (MSc)

Oct 2023 - Feb 2026

KU Leuven <https://www.kuleuven.be/kuleuven/>

Field of study: Bioscience Engineering

Graduated *Cum laude*

Bachelor of Bioinformatics (BSc)

Oct 2019 - Mar 2023

La Sapienza University of Rome <https://www.uniroma1.it/>

Fields of study: Natural sciences, mathematics and statistics, *Inter-disciplinary programmes*

Research Intern (Master Thesis) @ VIB.AI

Sep 2024 - Aug 2025

"Deciphering organism-wide gene regulation with genomic deep learning in *C. elegans*."

Developed deep learning models (convolutional and attention-based) to predict single-cell gene expression directly from genomic sequence in *C. elegans*. Integrated developmental-stage datasets and applied explainable AI methods to uncover regulatory features, advancing understanding of genome-wide regulatory logic.

Bachelor's Degree Thesis

Jun 2022 - Dec 2022

"The expression of CCRL2 combined to specialized endothelial cell signature is prognostic in human lung cancers."

Analyzed RNA-seq expression data from tumor patients taken from the TCGA database to understand the role of the atypical receptor CCRL2 in the endothelial population of cells in the lungs, in relation to natural killer cells and neutrophils.

PROJECTS

TRIDENT (Tri-Dimensional Embeddings Navigation Tool)

Aug 2025 - Ongoing

Developed TRIDENT, a Blender add-on made with Python and C++ that makes 3D visualization of embeddings from UMAPs and t-SNE dimensionality reduction plots intuitive and fast.

OpenNano – NanoString GeoMx Data Processing Toolkit.

Oct 2024 - Jan 2025

Developed OpenNano, a toolkit aimed at streamlining the processing and analysis of NanoString GeoMx data using Python.

COMPETENCES

Programming Languages: Python, R, Java, Bash, C#, C++
High-Performance Computing (HPC): Experience with HPCs (Vlaams Supercomputer Centrum)
Deep Learning: PyTorch, TensorFlow, Keras, CNNs, RNN, LSTMs, Transformer architectures

Tools and Pipelines: Data preprocessing, normalization, statistical analysis and visualization.
Sequencing Technologies: RNA-seq, scRNA-seq, scATAC-seq
Spatial Transcriptomics: Visium 10x, NanoString GeoMx
Website Development: CSS, JavaScript, Node.js, HTML

LANGUAGE SKILLS

Italian: Native Speaker

English: C1

Dutch: A1
